### KEY FINDINGS

- **Overall findings based on Sections 1 to 4**

- Most attacks by 'Terror Groups' are against geographic communities, and these are more often Christian communities than Muslim communities. Apart from causing direct harm, these attacks also destabilize communities, negatively affecting the survival of the victims, in particular Christians.
- 'Terror Groups' frequently engage in abductions. In this way they put additional pressure on civilians and religious communities, impoverishing them by demanding (excessive) ransom payments, and by creating serious trauma, while financing their own destructive operations. It applies for all, but Christians and churches are most often their victims.

- **Section 1: Summary data on killings in Nigeria's geopolitical zones and states**

- Over the three reporting periods (covering Oct 2019 – Sept 2022) the overall total of people killed in the context of the culture of violence created by 'Terror Groups' was 27,183. (The breakdown was 5,629 in the 2020 period; 7,569 in the 2021 period; and 13,985 in the 2022 period.)
- Out of these 27,183, the overall total of Christians killed was 12,793. (The breakdown was 3,613 in the 2020 period; 4,303 in the 2021 period; and 4,877 in the 2022 period.)
- In comparison, the overall total number of Muslims killed was 4,497. (The breakdown was 1,005 in the 2020 period; 1,230 in the 2021 period; and 2,262 in the 2022 period.)
- Over the three reporting periods the overall ratio of Christians/Muslims killed was **2.8/1**, not taking into account the size of the Christian and Muslim populations in the geopolitical zones and states where the killings took place. For Christians as well as Muslims, there was an increase in killings of around 20% from the 2020 period to the 2021 period. From the 2021 period to the 2022 period the increase in Christians killed was 13%, while the increase in Muslims killed was 84%.
- The overall ratio of Christians/Muslims killed does not take into account the size of the Christian and Muslim populations in the different Nigerian States where the killings took place. Based on the different sizes of their populations in the various states, it follows that the number of Christians killed was proportionally (much) higher than the overall number: over the three reporting periods (covering Oct 2019 – Sept 2022) the updated overall ratio of Christians/Muslims killed was **7.6/1**.

- **Section 2: Summary data on abductions in Nigeria’s geopolitical zones and states**

- The overall total of people abducted in the context of the culture of violence created by ‘Terror Groups’ was 13,843. (The breakdown was 1,224 in the 2020 period; 4,955 in the 2021 period; and 7,664 in the 2022 period.)
- Out of these 13,843, the overall total of Christians abducted was 7,923. (The breakdown was 977 in the 2020 period; 2,312 in the 2021 period; and 4,634 in the 2022 period.)
- In comparison, the overall total number of Muslims abducted was 5,019. (The breakdown was 85 in the 2020 period; 2,243 in the 2021 period; and 2,691 in the 2022 period.)
- Over the three reporting periods the overall ratio of Christians/ Muslims abducted was **1.6/1**, not taking into account the size of the Christian and Muslim populations in the geopolitical zones and states where the killings took place. For Christians as well as Muslims, there was an increase in abductions from the 2020 period to the 2021 period. For Christians the number more than doubled, for Muslims the number multiplied by 25. From the 2021 period to the 2022 period the increase in Christians abducted doubled again, while the increase of Muslims abducted was 20%.
- The overall ratio of Christians/Muslims abducted does not take into account the size of the Christian and Muslim populations in the different Nigerian states where the abductions took place. Based on the different sizes of their populations in the various states, it follows that the number of Christians killed was proportionally (much) higher than the overall number: over the three reporting periods (covering Oct 2019 – Sept 2022) the updated overall ratio of Christians/Muslims abducted was **6.0/1**.

- **Section 3: Distinguishing attacks on geographic communities from other forms of attack**

#### **Civilians killed during attacks**

- The number of attacks involving civilians killed in communities has consistently increased over the 2020, 2021 and 2022 periods. The number of attacks that were more on an individual basis remained stable in the 2020 and 2021 periods, but strongly increased in the 2022 period.<sup>1</sup>
- The great majority of civilians killed related to attacks on communities. The total of Christian and Muslim killed during these attacks was 17,290. The total number of Christian and Muslim victims killed during attacks on communities was 14,099 (82%). The total number of Christians and Muslim killed during attacks that were more on an individual basis was 3,191 (18%).

#### **Civilians abducted during attacks**

- The number of attacks on communities involving civilians abducted increased significantly in the 2021 period, followed by a slight decrease in the 2022 period. The number of attacks that were

---

<sup>1</sup> ‘Attacks on communities’ looks at geographic locations. It is about villages, neighborhoods of cities, etc. ‘Attacks on an individual basis’ looks at what happened on the road, on the farms, during worship in the churches or mosques, etc.

more on an individual basis consistently increased from the 2020 to the 2022 periods, with the greatest increase occurring in the 2022 period (153%).

- The great majority of civilians abducted is related to attacks on communities. The total of Christian and Muslim abducted during these attacks was 12,942. The total number of Christian and Muslim abducted during attacks on communities was 9,942 (77%). The total number of Christian and Muslim abducted during attacks that were more on an individual basis was 3,000 (23%).

- **Section 4: The spread of attacks comparing the farming season and the rest of the year**

#### **Civilians killed over the year**

- The monthly average number of incidents involving killings of civilians in the farming season increased consistently over the three reporting periods (72 – 90 – 130). The same was the case in the rest of the year, although there was a particularly large increase in the 2022 period (30 – 41 – 142).
- The monthly averages for the number of victims killed in these violent incidents showed a slightly different pattern. In the farming season they increased for the 2020 and 2021 periods but then decreased again, though staying above the level of the 2020 period (537 – 690 – 573). Outside that season the average numbers first slightly decreased but then increased significantly (252 – 236 – 674).
- While initially most attacks involving killings clearly took place during the farming season, the data suggests that more recently attacks have become more of a year-round phenomenon. Sections 1-3 of this report indicate that Christians were most affected by these attacks.

#### **Civilians abducted over the year**

- The monthly average of incidents involving abductions of civilians in the farming season increased significantly in the 2021 period but then decreased somewhat in the 2022 period (17 - 63 – 51). This was not the case for the rest of the year: The increase over the three reporting periods was consistent and strong (13 – 42 – 89).
- The monthly averages of the number of victims abducted consistently increased over the three reporting periods for both the farming season (88 – 476 – 611) and outside it (120 – 324 – 667). Contrary to the foregoing reporting periods, in the 2022 period the monthly averages for incidents as well as those for civilians abducted outside the farming season, where both higher than during the farming season.
- Attacks involving abductions have always been a year-round occurrence, more so than attacks involving killings. Although many civilians suffer from this situation, Sections 1-3 of this report indicate that Christians are most affected by these violent incidents.

## Introduction

The violence data presented in this report is the result of a three-year project of data-gathering by Nigerian partners within the country. The first phase of the project was from 1 October 2019 to 30 September 2020; the second phase from 1 October 2020 to 30 September 2021; the third phase from 1 October 2021 to 30 September 2022.

The project tried to be comprehensive in its registration of incidents involving killings and abductions. That means, it counted killings and abductions of civilians and their religious backgrounds, of the Security Forces and of perpetrators referred to as 'Terror Groups'. (see Section 1 below).

The violence data presented in this report, however, limits itself to killings and abductions in the context of a 'culture of violence' created by 'Terror Groups' such as Boko Haram, ISWAP, armed Fulani herders, 'bandits'<sup>2</sup> and other, smaller groups. Many factors play a role but violent Islamism, as a religious ideology, is an important part of it. Killings and abductions allegedly unrelated to violent Islamism (such as communal clashes) have not been included.

However hard one tries, a data-gathering project like this one is never complete since much violence goes unreported. Nevertheless, the researchers are confident that the data supplied gives a balanced indication of the situation in the country over the three reporting periods.

The numbers supplied in this report only represent actual victims of killings and abductions, however, many others were severely impacted. Incidents involving killings and abductions often represent a whole spectrum of violence and suffering: Communities raided or permanently occupied; people wounded or maimed; women and girls raped; houses, shops and other businesses destroyed or occupied; fields destroyed or occupied; houses of worship abandoned, closed or destroyed; people driven from their homelands into dire situations of internal displacement. Ransom payments bring families and religious communities to the brink of bankruptcy, while at the same time financing the operations of the 'Terror Groups'.

### How was the violence information collated?

In 2022 approximately 55% of the incidents were reported by ORFA's primary partner organization in Nigeria. The remaining 45% was sourced by ORFA researchers, other local partners, and other organizations.<sup>3</sup>

ORFA's primary partner organization collected information on the ground via their network whereas ORFA researchers and other organizations reviewed the latest media and NGO reports from local, national, and international sources.

ORFA considers the inclusion of attributes such as religious background critical for understanding the scale and nature of the violence.

---

<sup>2</sup> Bandits is a catch-all category used in many news reports, that might include the previously listed terror groups. The violence committed by 'bandits' is included in this report when there seems to be a direct or indirect relation to these groups. It is very likely that at times the term 'bandits' is not only used to simplify reporting but also to mask the true nature of the perpetrators.

<sup>3</sup> Name of primary partner organization withheld for security reasons. More information about these other sources can be obtained at request by email to ORFA.

ORFA's primary partner organization intentionally included data on the religion and age/gender of victims, which other local partners and other organizations collecting data do not provide. For this reason, our primary partner organization reviewed and confirmed each of these incidents that took place, and gathered additional data points (e.g., religious background, gender, age).

As a matter of practice, ORFA researchers work to triangulate all the information from different sources to avoid any incidents being reported multiple times and to provide as much relevant information as possible. Often there was an overlap of incidents initially reported by our primary partner organization and later also reported by ORFA researchers or other organizations. The additional reports often proved valuable and either confirmed facts already gathered from other sources or provided additional insights about specific incidents.

### **Why does the report include the religious background of the civilian victims?**

The report distinguishes between the religious background of the civilian victims because a variety of contradictory analyses exists concerning the causes of violence in Nigeria. Some analyses blame everything on a 'classical' herder-farmer conflict made worse by environmental degradation in the wider region.<sup>4</sup> Other analyses see as the exclusive guiding theme the vision of Usman Dan Fodio, a Fulani radical Islamic scholar who began an Islamic jihad in Gobir in 1804, and by 1808 had established the Sokoto Caliphate. He had vowed to enforce Islam through the power of the sword from the Sahara Desert in the north to the Atlantic Ocean in the south.

ORFA is not taking sides. The Observatory wants to **let the data speak for itself** without purposefully steering towards one or other of the narratives mentioned above.

## **1. Summary data on killings in Nigeria's geopolitical zones and states**

People killed in the context of the culture of violence created by 'Terror Groups' were categorized according to their religious background: Christian, Muslim or African Traditional Religionist (ATR). In some cases, the religious identity of the victims was unknown. The data also covers members of security forces killed and members of the 'Terror Groups' killed.

The numbers of Muslims killed through Christian local vigilantes' self-defense are included in this report, as are Muslims killed by retaliatory attacks by Christians on Muslims. However, the data shows that the majority of Muslims were killed by the same perpetrators as killed Christians, ATR, and members of security forces. This means, that most of the Muslims killed as reported by ORFA must not be seen as victims of Christians but as victims of their radicalized religious kin.

Table 1 compares the killings recorded for the three reporting periods under study:

- i. October 2019 to September 2020 – indicated in the column headings as 2020.
- ii. October 2020 to September 2021 – indicated in the column headings as 2021.
- iii. October 2021 to September 2022 – indicated in the column headings as 2022.

---

<sup>4</sup> "Classical" means that conflicts between herders and farmers have been ongoing for generations. However, "classical" also includes the scope of weapons used: 'sticks and machetes', not AK-47 rifles. The multiple use of assault weapons such as AK-47 rifles, at least partially undermines that narrative.

The total number of people killed in the 2020 period was 5,629; in the 2021 period 7,569; and in the 2022 period 13,985. This gives an overall total of 27,183 people killed.

### Christians and Muslims killed during the three reporting periods

From Table 1 it is possible to compare the total number of Christians/Muslims killed in the three reporting periods. The data shows that Christians were disproportionately affected by killings in the context of attacks by ‘Terror Groups’:

- The total number of Christians killed in the 2020 period was 3,613; in the 2021 period 4,303; and in the 2022 period 4,877. This gives an overall total of 12,793 Christians killed.
- The total number of Muslims killed in the 2020 period was 1,005; in the 2021 period 1,230; and in the 2022 period 2262. This gives an overall total of 4,497 Muslims killed.
- For both religious groups, there was an increase in killings of around 20% in the 2021 period. In the 2022 period the increase in Christians killed was 13%, while the increase in Muslims killed was 84%. Over the three reporting periods (covering Oct 2019 – Sept 2022) the overall ratio of Christians/Muslims killed was **2.8/1**.

Table 1 shows a significant increase of members of ‘Terror Groups’ killed over the three reporting periods: From 297 in 2020 to 5,675 in 2022 (19.1 times as many). Although the data over the 2020 and 2021 periods might be relatively low because of the focus of data-gathering at that time, it is clear that in the 2022 period many more members of ‘Terror Groups’ were killed than in the foregoing periods. Most of them were killed by the ‘Security Forces’, others by vigilantes.<sup>5</sup>

There also was a significant increase of members of the ‘Security Forces’ killed, normally in confrontations with the ‘Terror Groups’: the number of personnel killed increased from 310 in 2020 to 930 in 2022 (3 times as many).

Table 1: Number of people killed in the 3 reporting periods

Comparison registered killings from 2020 to 2022																		
Geopolitical zone	Total Killed			Christians			Muslims			Unknown Religious identity (includes ATRs)			Security Forces			Terror Groups

<sup>5</sup> A December 2022 Reuters report series started a discussion of whether the many members of ‘Terror Groups’ killed, were always really perpetrators or maybe partly normal citizens suspected of being perpetrators or at least actively collaborating with them, or maybe sometimes even citizens killed to feign the effectiveness of the security forces in combatting perpetrators, in particular those connected with Boko Haram: [Nightmare in Nigeria: The army’s secret campaigns to crush Boko Haram \(reuters.com\)](https://www.reuters.com/world/africa/nightmare-nigeria-armys-secret-campaigns-crush-boko-haram-2022-12-01/).

Comparison registered killings from 2020 to 2022 (continued)																			
Geopolitical zone	Total Killed			Christians			Muslims			Unknown Religious identity (includes ATRs)			Security Forces			Terror Groups

% In/Decrease	85	34		13	19		84	22		-49	17		37	119		542	198		

Appendix 1A, 1B and 1C give the details per state per reporting period.

The overall ratio of Christians/Muslims killed does not take into account the size of the Christian and Muslim populations in the different Nigerian States.

### The number of Christians and Muslims killed per reporting period - adjusted according to population percentages

Tables 2, 3 and 4 below take into account the size of the Christian and Muslim populations in the geopolitical zones and states where the killings took place. Based on the different sizes of their populations in the various states, it follows that the number of Christians killed is proportionally (much) higher than the statistics in Table 1 show. This applies for all three reporting periods presented below, beginning with the first reporting period in 2020.

Table 2 gives the data for the 2020 period. The total number of Christians killed was 3,613 compared to 1,005 Muslims, thus indicating that 3.6 times as many Christians were killed as Muslims. When the Christian/Muslim population levels of each state are factored in, the number of Christians killed is proportionally 9,651, which is **9.6 times more than the number of Muslims killed** in the context of violence created by 'Terror Groups'. That is 2.7 times more than when the religious demographics are excluded.

Table 2: Number of Christians/Muslims killed in the period Oct 2019 – Sept 2020 taking into account the Christian/Muslim population levels

Religious killings Nigeria Oct 2019 - Sept 2020						
Geopolitical zone	Christians killed	% Christians in the State	Muslims killed	% Muslims in the State	Numerical value of Christians killed compared to Muslims killed based on the proportionality of their numbers in the State	Factor ref. Christians killed compared to Muslims killed based on the proportionality of their numbers in the State
NORTH WEST	1,449	(see App. 2A)	517	(see App. 2A)	4,891	9.5
NORTH CENTRAL	858	(see App. 2A)	61	(see App. 2A)	1,275	20.9

<b>GRAND TOTAL</b>	<b>3,613</b>		<b>1,005</b>		<b>9,651</b>	
Proportion Christian victims to Muslim victims			3.6			9.6
Ratio of enriched and initial proportions						2.7

Table 3 gives the data for the 2021 period. Whereas the total number of Christians killed was 4,303 compared to 1,230 Muslims, thus indicating that 3.5 times as many Christians were killed as when the Christian/Muslim population levels of each state are factored in, the number of Christians killed is proportionally 9,560, which

is **7.8 times more than the number of Muslims killed** in the context of violence created by ‘Terror Groups’. That is 2.2 times more than when the religious demographics are excluded.

Table 3: Number of Christians/Muslims killed in the period Oct 2020 – Sept 2021 taking into account the Christian/Muslim population levels

Religious killings Nigeria Oct 2020 - Sept 2021						
Geopolitical zone	Christians killed	% Christians in the State	Muslims killed	% Muslims in the State	Numerical value of Christians killed compared to Muslims killed based on the proportionality of their numbers in the State	Factor ref. Christians killed compared to Muslims killed based on the proportionality of their numbers in the State

### The total number of Christians and Muslims killed per reporting period - adjusted according to population percentages

From Table 5 it is possible to compare the total number of Christians/Muslims killed in the three reporting periods, taking into account the Christian/Muslim population levels. The data clearly shows that Christians were disproportionately affected by killings in the context of attacks by ‘Terror Groups’:

- The numerical value of Christians killed compared to Muslims killed based on the proportionality of their numbers in the Nigerian State, in the 2020 period was 9,651; in the 2021 period 9,560; and in the 2022 period 14,854. This gives an overall total of 34,065 Christians killed, when their proportion and the proportion of Muslims in the various states are taken into consideration.
- The total number of Muslims killed in the 2020 period was 1,005; in the 2021 period 1,230; and in the 2022 period 2,262. This gives an overall total of 4,497 Muslims killed.
- Over the three reporting periods (covering Oct 2019 – Sept 2022) the overall ratio of Christians/Muslims killed was **7.6/1**, when their proportions in the various states are taken into consideration.

Table 5: Comparison of the number of Christians killed in the period Oct 2019 – Sept 2022 taking into account the Christian/Muslim population levels.

Comparison Religious Killings 2020 -2022

Appendix 2A, 2B and 2C give the details per state per reporting period.

## 2. Summary data on abductions in Nigeria’s geopolitical zones and states

In this section, the same method has been used as for the killings in Section 1. People abducted in the context of the culture of violence created by ‘Terror Groups’ were categorized according to their religious background: Christian, Muslim, African Traditional Religionist (ATR). In some cases, the religious identity of the victims was unknown. The data also covers members of the security forces abducted.

Table 6 compares registered abductions for the three reporting periods under study:

- October 2019 to September 2020 – indicated in the column headings as 2020
- October 2020 to September 2021 – indicated in the column headings as 2021.
- October 2021 to September 2022 – indicated in the column headings as 2022.

The total number of people abducted in the 2020 period was 1,224; in the 2021 period 4,955; and in the 2022 period 7,664. This gives an overall total of 13,843 people abducted.

## Christians and Muslims abducted during the three reporting periods

From Table 6 it is possible to compare the total number of Christians/Muslims abducted in the three reporting periods. The data shows that Christians were disproportionately affected by abductions in the context of attacks by ‘Terror Groups’:

- The total number of Christians abducted in the 2020 period was 977; in the 2021 period 2,312; and in the 2022 period 4,634. This gives an overall total of 7,923 Christians abducted.
- The total number of Muslims abducted in the 2020 period was 85; in the 2021 period 2,243; and in the 2022 period 2,691. This gives an overall total of 5,019 Muslims abducted.
- For both religious groups, there was an increase in abductions in the 2021 period. For Christians, the number more than doubled, for Muslims the number multiplied by 25. In the 2022 period the increase in Christians abducted doubled again, while the increase in Muslims abducted was 20%. Over the three reporting periods (covering Oct 2019 – Sept 2022) the overall ratio of Christians/Muslims abducted was **1.6/1**.

Table 6: Number of people abducted in the three reporting periods

Appendix 3A, 3B and 3C give the details per state for all three reporting periods.

The overall ratio of Christians/Muslims abducted does not take into account the size of the Christian and Muslim populations in the different Nigerian States.

### The number of Christians and Muslims abducted per reporting period - adjusted according to population percentages

Tables 7, 8 and 9 below now take into account the size of the Christian and Muslim populations in the geopolitical zones and states where the abductions took place. Based on the different sizes of their populations in the various states, it follows that the number of Christians abducted is proportionally (much) higher than the statistics in Table 4 show. This applies for all three reporting periods presented below, beginning with the first reporting period in 2020.

Table 7 gives the data for the 2020 period. Whereas the total number of Christians abducted was 977 compared to 85 Muslims, thus indicating that 11.5 times as many Christians were abducted as Muslims, when the Christian/Muslim population levels of each state are factored in, the number of Christians abducted is proportionally 5,044, which is **59.3 times more than the number of Muslims abducted** in the context of violence created by ‘Terror Groups’. That is 5.2 times more than when the religious demographics are excluded.

Table 7: Number of Christians/Muslims abducted in the period Oct 2019 – Sept 2020 taking into account the Christian/Muslim population levels

Religious Abductions Nigeria Oct 2019 - Sept 2020						
Geopolitical zone	Christians abducted	% Christians in the State	Muslims abducted	% Muslims in the State	Numerical value of Christians abducted compared to Muslims abducted based on the proportionality of their numbers in the State	Factor ref. Christians abducted compared to Muslims abducted based on the proportionality of their numbers in the State
NORTH WEST	520	(see App. 4A)	10	(see App. 4A)	3,943	394.3
NORTH CENTRAL	221	(see App. 4A)	44	(see App. 4A)	497	11.3

SOUTH WEST	17	(see App. 4A)	0	(see App. 4A)	10	(N/A; see App. 4A)
<b>GRAND TOTAL</b>	<b>977</b>		<b>85</b>		<b>5,044</b>	
Proportion Christian victims to Muslim victims			<b>11.5</b>			<b>59.3</b>
Ratio of enriched and initial proportions						<b>5.2</b>

Table 8 gives the data for the 2021 period. In the 2021 period, whereas the total number of Christians abducted was 2,312 compared to 2,243 Muslims, thus seeming to indicate very similar targeting, when the Christian/Muslim population levels of each state are factored in, the number of Christians abducted is proportionally 9,120, which is **4.1 times more than then number of Muslims abducted** in the context of violence created by ‘Terror Groups’. That is 3.9 times more than when the religious demographics are excluded.

Table 8: Number of Christians/Muslims abducted in the period Oct 2020 – Sept 2021 taking into account the Christian/Muslim population levels

Religious Abductions Nigeria Oct 2020 - Sept 2021						
Geopolitical zone	Christians Abducted	% Christians in the State	Muslims Abducted	% Muslims in the State	Numerical value of Christians abducted compared to Muslims abducted based on the proportionality of their numbers in the State	Factor ref. Table 9 gives the data for the 2022 period. In the 2021 period, whereas the total number of Christians abducted was 4,634 compared to 2,691 Muslims, thus indicating that 1.7 times as many Christians were abducted as Muslims, when the Christian/Muslim population levels of each state are factored in, the number of Christians abducted is proportionally 15,805, which is **5.9 times more than then the number of Muslims abducted** in the context of violence created by ‘Terror Groups’. That is 3.4 times more than when the religious demographics are excluded.

### The total number of Christians and Muslims abducted per reporting period - adjusted according to population percentages

From Table 10 it is possible to compare the total number of Christians/Muslims abducted in the three reporting periods, taking into account the Christian/Muslim population levels. The data now even more clearly show that Christians were disproportionately affected by abductions in the context of attacks by ‘Terror Groups’:

- The numerical value of Christians abducted compared to Muslims abducted based on the proportionality of their numbers in the Nigerian State, in the 2020 period was 5,044; in the 2021 period 9,120; and in the 2022 period 15,805. This gives an overall total of 29,969 Christians abducted, when their proportion and the proportion of Muslims in the various states are taken into consideration.
- The total number of Muslims abducted in the 2020 period was 85; in the 2021 period 2,243; and in the 2022 period 2,691. This gives an overall total of 5,019 Muslims abducted.
- Over the three reporting periods (covering Oct 2019 – Sept 2022) the overall ratio of Christians/Muslims abducted was **6.0/1**, when their proportions in the various states are taken into consideration.

Table 10: Comparison of the number of Christians abducted in the period Oct 2019 – Sept 2022 taking into account the Christian/Muslim population levels.

Comparison Religious Abductions 2020 -2022

Ratio of enriched and initial proportions								3.4	3.9	5.2

Appendix 4A, 4B and 4C give the details per state for all three reporting periods.

### 3. Distinguishing attacks on communities from other forms of attack

(The data presented in this section does not take into account the proportionality of Christian and Muslim populations in the different states but refers to the directly recorded numbers. Proportionality would further emphasize the trends.)

This section looks deeper into the attacks leading to killings or abductions. It distinguishes between **attacks on communities** and **other attacks that were more on an individual basis**. Therefore, the analysis focuses on civilians: “Christians”, “Muslims” and “Unknown Religious Identity (includes ATR)” (see Table 1 for killings and Table 6 for abductions), not on “Security Forces” or “Terror Groups” killed.

Attacks on communities are especially devastating for the victims. As indicated in the introduction, it is particularly attacks on communities which often involve a whole spectrum of violence and suffering with people killed or abducted; people wounded or maimed; women and girls raped; houses, shops and other businesses destroyed or occupied; fields destroyed or occupied; houses of worship abandoned, closed or destroyed; people driven from their homelands into dire situations of internal displacement.

#### 3.1 Killings in community or other attacks

Table 11 gives the data for killings for the 2020 period. In the 2020 period, the data shows that most attacks were carried out on communities (72%), and most killings occurring during those attacks (88%).

The number of Christians killed during community attacks was 3,190 (72%) which was considerably higher than the number of Muslims killed: 906 (20%). In other forms of attack, Christians were also more often victims: 423 Christians were killed (71%) as opposed to 99 Muslims (17%).

**Note:** For Tables 11 to 18 the percentages for “% of victims in community attacks” and the percentages for “% of victims in other attacks” do normally not add up to 100% because the data category “Unknown religious identity (includes ATR)” is not included in the tables. For most incidents in this category the religious identity of the victims is unknown, while the numbers for ATR are very small.

*Table 11: Number of Christians/Muslims attacked and number of incidents in the period Oct 2019 – Sept 2020 taking into account the community or other context*

<b>Civilian Killing Analysis: within the community context or other context (Oct 2019 - Sept 2020)</b>										
			<b>Community killings</b>				<b>Other killings</b>			
	<b>Grand total victims</b>	<b>Grand total # of incidents</b>	<b>Total community victims</b>	<b>Total Community incidents</b>	<b>Christian victims</b>	<b>Muslim victims</b>	<b>Total other victims</b>	<b>Total other incidents</b>	<b>Christian victims</b>	<b>Muslim victims</b>
Grand Total	5,022	655	4,429	472	3,190	906	593	183	423	99
% of victims in types of attacks			88				12			
% of incidents in types of attacks				72				28		
% of victims in community attacks					72	20				
% of victims in other attacks									71	17

Table 12 gives the data for killings in the 2021 period and shows that most attacks were carried out on communities (78%), with most killings occurring during those attacks (88%).

The number of Christians killed during community attacks was 3,744 (71%) which was considerably higher than the number of Muslims killed – 1,076 (20%). In other forms of attack, Christians were also more often victims (77%) than Muslims (21%).

*Table 12: Number of Christians/Muslims attacked in the period Oct 2020 – Sept 2021 taking into account the community or other context*

<b>Civilian Killing Analysis: within the community context or other context (Oct 2020- Sept 2021)</b>										
			<b>Community killings</b>				<b>Other killings</b>			
	<b>Grand total victims</b>	<b>Grand total # of incidents</b>	<b>Total community victims</b>	<b>Total Community incidents</b>	<b>Christian victims</b>	<b>Muslim victims</b>	<b>Total other victims</b>	<b>Total other incidents</b>	<b>Christian victims</b>	<b>Muslim victims</b>
Grand Total	6,007	835	5,282	652	3,744	1,076	725	183	559	154
% of victims in types of attacks			88				12			
% of incidents in types of attacks				78				22		
% of victims in community attacks					71	20				
% of victims in other attacks									77	21

Table 13 gives the data for killings in the 2022 period and shows that the number of attacks on communities was comparable to the number of other attacks that were more on an individual basis (48%). That is different than in the two foregoing reporting periods. However, most killings still occurred during those attacks (72%).

The number of Christians killed during community attacks was 3,317 (62%) which was considerably higher than the number of Muslims killed – 1,866 (35%). In other forms of attack, Christians were also more often victims (76%) than Muslims (19%).

Table 13: Number of Christians/Muslims attacked and number of incidents in the period Oct 2021 – Sept 2022 taking into account the community or other context

Civilian Killing Analysis: within the community context or other context (Oct 2021- Sept 2022)										
	Community killings						Other killings			
	Grand total victims	Grand total # of incidents	Total community victims	Total community incidents	Christian victims	Muslim victims	Total other victims	Total other incidents	Christian victims	Muslim victims
Grand Total	7,380	1,620	5,318	775	3,317	1,866	2,062	845	1,560	396
% of victims in types of attacks			72				28			
% of incidents in types of attacks				48				52		
% of victims in community attacks					62	35				
% of victims in other attacks									76	19

### Killings in community or other attacks: Overall numbers for the three reporting periods together

Table 14 compares the data for the three reporting periods:

- Over the three reporting periods the total number of incidents involving civilians killed was 3,110, with 1,899 (61%) attacks carried out on communities and 1,211 (39%) attacks that were more on an individual basis.
- The number of attacks on communities has consistently increased over the 2020, 2021 and 2022 periods. The number of attacks that were more on an individual basis remained stable in the 2020 and 2021 periods, but increased significantly in the 2022 period.
- The total of Christian and Muslim victims from all attacks was 17,290. The total number of Christian and Muslim victims from attacks on communities was 14,099 (82%). The total number of Christian and Muslim victims from attacks that were more on an individual basis was 3,191 (18%).<sup>6</sup> It follows that the great majority of civilian victims was caused by attacks on communities.
- The average number of victims per incident or attack was  $18,409 / 3,110 = 5.92$  people. The average number of victims per attack on communities was 7.91 people. The average number of victims per attack that was more on an individual basis was 2.80.<sup>7</sup>
- The data suggests that ‘Terror Groups’ have a preference to destabilize communities, and these are more often Christian communities than Muslim communities. So apart from causing direct harm, they also seem to aim at negatively affecting the survival of their victims, particularly of Christians.

<sup>6</sup> For the complete number of civilian victims, the category ‘Unknown Religious Identity (includes ATR)’: 1,119 is added, making a total of 18,409.

<sup>7</sup> Based on proportional distribution of 1,119 (‘Unknown Religious Identity [includes ATR]’) over both types of attacks:  $14,099 + 918 = 15,017$ ;  $3,191 + 201 = 3,392$ .

Table 14: Comparison of the volume of incidents and killings in the period 2020 -2022 (differentiating between Community and Other Killings and including subtotals for the number of Christians and Muslims killed)

Comparison Community and Other Incidents with Killings 2020 – 2022					
		Community killings		Other killings

<b>TOTAL</b>	<b>10,251</b>	<b>3,848</b>	<b>14,099</b>	<b>2,542</b>	<b>649</b>	<b>3,191</b>

Appendix 5A, 5B and 5C give the details per state for all 3 of the reporting periods. Please note that the above analysis is for “civilian victims” whereas 5a, 5b and 5c provide a total view of all victims.

### 3.2 Abductions in community or other attacks

Table 15 gives the data for abductions in the 2020 period and shows that most attacks were carried out on communities (57%), with most abductions occurring during those attacks (70%).

The number of Christians abducted during community attacks was 654 (77%) which was considerably higher than the number of Muslims abducted – 73 (9%). In other forms of attack, Christians were also much more often victims of abduction (88%) than Muslims (3%).

Table 15: Number of Christians/Muslims abducted in the period Oct 2019 – Sept 2020 taking into account the community or other context

Abduction Analysis: within the community context or other context (Oct 2019 - Sept 2020)										
			Community abductions				Other abductions			
	Grand total victims	Grand total # of incidents	Total Community victims	Total Community incidents	Christian victims	Muslim victims	Total other victims	Total other incidents	Christian victims	Muslim victims
Grand Total	1,215	184	849	105	654	73	366	79	323	12
% of victims in types of attacks			70				30			
% of incidents in types of attacks				57				43		
% of victims in community attacks					77	9				
% of victims in other attacks									88	3

The picture partly changes for the 2021 period as shown in Table 16. In the 2021 period, the percentage of attacks carried out on communities increased significantly to 81%, with the percentage of abductions occurring during those attacks also increasing (87%).

In this 2021 period, the number of Christians abducted during community attacks was 1,967 (45%) which is slightly lower than the number of Muslims abducted - 2,140 (49%), although for both the total numbers increased strongly as compared to the 2020 period. In other forms of attack, Christians were still more often victims of abduction (55%) than Muslims (17%).

Table 16: Number of Christians/Muslims abducted in the period Oct 2020 – Sept 2021 taking into account the community or other context

Abduction Analysis: within the community context or other context (Oct 2020 - Sept 2021)										
			Community abductions				Other abductions			
	Grand total victims	Grand total # of incidents	Total Community victims	Total Community incidents	Christian victims	Muslim victims	Total other victims	Total other incidents	Christian victims	Muslim victims
Grand Total	4,955	650	4,331	524	1,967	2,140	624	126	345	103

% of incidents in types of attacks				81				19		
% of victims in community attacks					45	49				
% of victims in other attacks									55	17

Table 17 gives the data for abductions in the 2022 period and shows that most attacks were carried out on communities (60%), with most abductions occurring during those attacks (70%). The percentages are comparable to the 2020 period, but the numbers are much higher.

The number of Christians abducted during community attacks was 2,951 (55%) which was higher than the number of Muslims abducted – 2,157 (40%). In other forms of attack, Christians were much more often victims of abduction (75%) than Muslims (24%).

Table 17: Number of Christians/Muslims abducted in the period Oct 2021 – Sept 2022 taking into account the community or other context

Abduction Analysis: within the community context or other context (Oct 2021 - Sept 2022)

% of victims in other attacks									75	24

### Abductions in community or other attacks: Overall numbers for the three reporting periods together

Table 18 compares the data for the three reporting periods. The pattern shown for killings in community or other attacks is confirmed by the data for abductions, although the numbers and percentages often differ.

- Over the three reporting periods the total number of incidents involving civilians abducted was 1,639,

with 1,115 (61%) attacks carried out on communities and 524 (39%) attacks that were more on an individual basis.

- The number of attacks on communities increased significantly in the 2021 period, followed by a slight decrease in the 2022 period. The number of attacks that were more on an individual basis consistently increased in the 2021 and 2022 periods, with the greatest increase in the 2022 period (153%).
- The total number of Christian and Muslim victims from all attacks was 12,942. The total number of Christian and Muslim victims from attacks on communities was 9,942 (77%). The total number of Christian and Muslim victims from attacks that were more on an individual basis was 3,000 (23%).<sup>8</sup> It follows that the great majority of civilian victims was caused by attacks on communities.
- The average number of victims per incident or attack was  $13,777 / 1,639 = 8.41$  people. The average number of victims per attack on communities was 9.49 people. The average number of victims per attack that was more on an individual basis was 6.09.<sup>9</sup> This is considerably higher than for the Killings (5.92 and 2.80 respectively).
- The data suggests that ‘Terror Groups’, apart from having a preference to destabilize mostly Christian communities, engage in abductions as an additional way to put pressure on civilians, through ransom and by creating serious trauma, in particular to Christians. Debts incurred by families to pay for ransoms, could easily bring them to the brink of bankruptcy, and even cause continued debt for generations to come. This aggravates the effect caused by the Killings, and accentuates the suggested intention to negatively affect the survival of their victims, in particular of Christians.

Table 18: Comparison of the volume of incidents and abductions in the periods 2020-2022 (differentiating between Community and Other Abductions and including subtotals for the number of Christians and Muslims abducted)

Comparison Community and Other Incidents with abductions 2020 – 2022					
		Community Abductions		Other Abductions	
	Grand total # of incidents with abductions	Total community incidents	% increase community incidents	Total other incidents	% increase other incidents
2020 period	184	105		79	
2021 period	650	524	399	126	59
2022 period	805	486	-7	319	153
<b>TOTAL</b>	<b>1,639</b>	<b>1,115</b>		<b>524</b>	

(Continued below)

<sup>8</sup> For the complete number of civilian victims, the category ‘Unknown Religious Identity (includes ATR)’: 835 is added, making a total of 13,777.

<sup>9</sup> Based on proportional distribution of 835 (‘Unknown Religious Identity [includes ATR]’) over both types of attacks:  $9,942 + 643 = 10,585$ ;  $3,000 + 192 = 3,192$ .

Comparison Community and Other Incidents with abductions 2020 – 2022						
	Community Abductions			Other Abductions		
	Christians abducted	Muslims abducted	Total abducted	Christians abducted	Muslims abducted	Total abducted
<b>2020 period</b>	654	73	727	323	12	335
<b>2021 period</b>	1,967	2,140	4,107	345	103	448
<b>2022 period</b>	2,951	2,157	5,108	1,683	534	2,217
<b>TOTAL</b>	<b>5,572</b>	<b>4,370</b>	<b>9,942</b>	<b>2,351</b>	<b>649</b>	<b>3,000</b>

Appendix 6A, 6B and 6C give the details per state for all 3 of the reporting periods. Please note that the above analysis is for “civilian victims” whereas 6A, 6B and 6C provide a total view of all victims.

## 4. The spread of attacks over the year

(The data presented in this section do not take into account the proportionality of Christian and Muslim populations in the different states but refer to the directly recorded numbers. Proportionality would further emphasize the trends.)

This section looks more closely at how the attacks are spread over the course of a year. The year is divided into two main periods:

- (1) March – September: These are the months with most farming activities in the northern states and is also when most attacks take place.
- (2) October – February: These are the months with less farming activities.

Attacks in the farming season have the greatest impact: Farming activities are disrupted, which involves all manner of danger for survival.<sup>10</sup>

Tables 19 - 26 below now look at the total number of people killed and abducted throughout the months of the reporting periods to see if there was a bias towards targeting civilians during the farming season, or not. Therefore, the analysis focuses on civilians: “Christians”, “Muslims” and “Unknown Religious Identity (includes ATR)” (see Table 1 for killings and Table 6 for abductions), not on “Security Forces” or “Terror Groups” killed.

### 4.1 Killings over the year

Table 19 shows the data for all attacks with killings in the 2020 period. In the 2020 period, there were on average 72 incidents per month in the farming season compared to 30 per month in the non-farming period; the average number of killings per month in the farming season were 537 persons killed compared to 252 in the non-farming season.

<sup>10</sup> Anecdotal evidence suggests there are other shorter specific periods of attack: Christmas, New Year and Easter seasons; sometimes during festive periods as marriages and funerals. ORFA’s analysis of the data did not look into this level of detail.

Table 19: The spread of killings over the months of the reporting period Oct 2019 – Sept 2020

	Incidents Oct 2019– Sept 2020												
	Grand total # of Incidents	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep

Average for October till February						674							

**Killings over the farming season and the rest of the year: Overall numbers for the three reporting periods together**

Table 22 compares the data for the three reporting periods.

- The monthly average of incidents involving killings of civilians in the farming season increased consistently over the 2021 and 2022 periods (72 – 90 – 130). The same was the case in the rest of the year, although there was a relatively large increase in the 2022 period (30 – 41 – 142).
- The monthly averages of the number of victims from these violent incidents showed a slightly different pattern. In the farming season they increased in the 2021 period but then decreased again, though staying above the level of the 2020 period (537 – 690 – 573). Outside of the farming season the monthly averages of the number of victims first slightly decreased but then increased significantly in the 2022 period (252 – 236 – 674).
- The data would appear to confirm the conclusions in Section 3 which distinguished between attacks on communities and other attacks that were more on an individual basis. The impact of destabilizing communities and threatening their survival is biggest during the farming season. However, the data also suggest that attacks in 2022 have become more of a year-round phenomenon. The Sections 1-3 of this report indicate that Christians were most affected by these attacks.

Table 22: Comparison of the volume and spread of incidents and killings over the months from Oct 2019 – Sept 2022

Incidents and Victims Oct 2019 – Sept 2022						
	Incidents			Victims

<b>Averages for whole year</b>	<b>135</b>	<b>70</b>	<b>55</b>	<b>615</b>	<b>501</b>	<b>419</b>

Appendix 7A, 7B and 7C give the details per state for all three reporting periods.

## 4.2 Abductions over the year

Table 23 shows the data for all attacks with abductions in the 2020 period. In this period, there were on average 17 incidents per month in the farming season compared to 13 per month in the non-farming period; the average number of abductions per month in the farming season were 88 persons abducted compared to 120 in the non-farming season.

Table 23: The spread of abductions over the months of the reporting period Oct 2019 – Sept 2020<sup>11</sup>

	Incidents Oct 2019 – Sept 2020												
	Grand total # of incidents	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep
Grand total	184	6	8	12	19	19	17	16	11	23	19	18	16
Totals for March till September													120
Average for March till September													17
Totals for October till February						64							
Average for October till February						13							

	Victims Oct 2019 – Sept 2020												
	Grand total # of victims	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep
Grand total	1,215	28	27	61	345	137	75	59	51	86	101	74	171
Totals for March till September													617
Average for March till September													88
Totals for October till February						598							
Average for October till February						120							

<sup>11</sup> The average number of people abducted per incident outside the farming season was 9.3. That seems very high. It suggests that during attacks the emphasis during the farming season was more on killing people and outside the farming season more on abducting people.

Table 24 shows the data for all attacks with abductions in the 2021 period. In this period, there were on average 63 incidents per month in the farming season compared to 42 per month in the non-farming period; the average number of abductions per month in the farming season was 476 persons abducted compared to 324 in the non-farming season.

## Abductions over the farming season and the rest of the year: Overall numbers for the three reporting periods together

Table 26 compares the data for the three reporting periods.

- The monthly average of incidents involving abductions of civilians in the farming season increased significantly in the 2021 period but then decreased somewhat in the 2022 period (17 - 63 – 51). This was not the case for the rest of the year: There was a significant and consistent increase in the 2021 and 2022 periods (13 – 42 – 89).
- The monthly averages for the number of victims from these violent incidents consistently increased over the 2021 and 2022 periods for both the farming season (88 – 476 – 611) and outside it (120 – 324 – 667).
- Although in the 2020 period the monthly average for incidents of abduction during the farming season was higher than outside the farming season, the monthly average of civilians abducted outside the farming season was higher. In the 2022 period the monthly averages for the number of incidents as well as for civilians abducted outside the farming season, were both higher than during the farming season.
- Building on Section 3, and the conclusions on killings in this Section 4, the data suggests that abductions are year-round. The constant threat of abductions arguably contributes towards the impact of destabilizing communities, threatening their survival, and maintaining an overall, very intense ‘culture of violence’ in Nigeria. Although many civilians suffer from this situation, the Sections 1-3 of this report indicate that Christians are most affected by these violent incidents.

Table 26: Comparison of the volume and spread of abductions over the months from Oct 2019 – Sept 2022
